

About us

Phillips Corporation is a unique community of high performers dedicated to rapid-paced continuous improvement for the purpose of providing unusual levels of productivity and service.

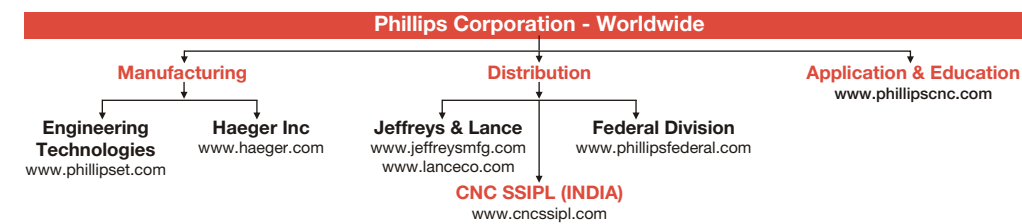

Established in 1961, we are a global supplier of manufacturing technology products and services primarily focused on machine tools. With performance centers located worldwide, we offer you an unmatched breadth of experience and competencies.

Since 1984, Phillips Corporation has been bringing its global experience in manufacturing and distributing machine tools to India and offers unmatched value through high-performance sales and service.

Established in 2008, CNC Servicing & Solutions India Pvt. Ltd. (CNC SSIPL) is an Indian subsidiary of Phillips Corporation.

We are engaged in offering CNC machine tools and rotary products manufactured by Haas Automation Inc. based in Oxnard, California. CNC SSIPL offers its customers Service and Application support with unflinching commitment through a team of more than 80 people. This unique capability makes us the best and our customer satisfaction level is the highest amongst the industry.

We ensure most pertinent solutions which include precision CNC machine tools, expert service and repairs, turnkey solutions, machine tool programming, operator training, comprehensive annual maintenance services and logistics support.

Simple. Innovation

Product offering
Wide range

Established in 1983, Haas Automation offers an extensive range of CNC machine tools, machining & turning centers and rotary tables. Haas builds its own control which is the most user friendly control in the world.

The company is committed to manufacturing all critical components and carrying out precision machining in-house, a unique capability which makes it a world leader. Engineers at Haas Automation continually refine and re-engineer their unique range of machines to the ultimate goal - perfection. For this, Haas has 1 million square feet design and manufacturing set up at Oxnard, California.

The Haas Range

- Over 60 VMC models
- Over 21 HMC models
- 20 turning center models
- 45 multi axis rotary models
- 3 Gantry router models
- High speed Mill Drill Centre and new Drill Tap Centre
- Mini-Mill series
- Tool room mills
- Tool room lathes
- Office machining products

Application support

CNC SSIPL offers comprehensive application support to its customer, deriving the highest productivity from their machine tools.

Fixturing & tooled-up solutions

Designing & development of custom-made fixturing assures complete solutions from 'The machine to component prove-out'. Our expertise in 'Tooled-up' turnkey solutions includes cutting tool selection with optimum process parameters and cycle time.

Programming support

Our Applications team combines the knowledge of our machine control features, CAD-CAM, & machining technology to achieve the shortest cycle time.

Application training

Our application services include lean manufacturing consultation and design, set up reduction, programming, and complete manufacturing solutions.

- **Off-line CNC Programming**
Instructions, work holding orientation, and tool lists.
- **Customer Process Evaluation**
Part processing programming, work holding, tooling, and proper choice of machine tool.
- **Lean Manufacturing Processes**
Evaluation of customer processes to help customers realize more effective manufacturing through implantation of lean processes in the entire manufacturing work environment.
- **1st Part Process Development**
Part process implementation to complete machine build.

Service offering

Application support

Service offering

Legendary customer service

Machine Installations

The team of our service engineers shoulders the complete responsibility of installation and commissioning of the machines you ordered. This includes right from unpacking of machines to successful job tryouts.

By this virtue, your machine becomes productive in the shortest possible time and starts paying back on your investment soon.

Operator training

Classroom training sessions are organized periodically at various Haas Factory Outlets across the country. They help your operators to understand advanced capabilities of your machines and seek training on using these capabilities to your fullest advantage.

Warranty / AMCs

To ensure highest up time of machines and economical spare parts replacement, we offer our customers Annual Maintenance Contracts at very attractive costs after the expiry of warranty period. In a way, this becomes your extended warranty.

Service offering
Service support

Backed by the legendary Haas global service network, in India, service support from CNC-SSIPL is acclaimed by the industry. We guarantee our customers prompt, never-failing service through our well-spread network, ever-ready service vans fully loaded with all

types of original spares and with our offices having large stocks of spares. Add to this, our on-the-toe service engineers who ensure least possible down time of machines. Our service support assures highest customer delight.

Service offering

Test certification

Ballbar instrument test certification

In order to ensure you high performance and consistent accuracy from your machine, we provide periodic calibration and certification service for Ballbar instrument test.

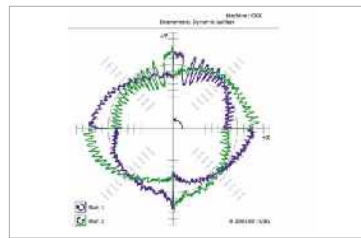

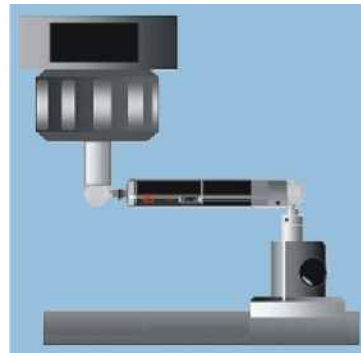

- Ballbar test is for ensuring circularity and interpolation performance of a CNC machine.
- Machine condition and performance data can be obtained in graphical as well as data table formats.
- Ballbar test displays the following machine performance parameters for evaluation.

Control Loop Errors

- Servo mismatch
- Reversal spikes
- Backlash or lost motion
- Cyclic errors
- Scaling errors

Axis Slide Way Errors

- Squareness
- Straightness
- Lateral play (slop)
- Stick-slip and vibration
- Positional tolerance

Service offering

Commercial solutions

Our customers find it utmost easy to place order for machines with us because of our friendly commercial solutions. They include

- Machine evaluation
- Import regulations
- Trading
- Complete import documentation
- Customs clearance
- Warehousing facilities
- Entire logistics support for shipping and transportation
- Fully insured machine delivery to your door-step
- Machine finance
