

## Robotic Workpiece Handling

Robotic Workpiece Handling  
Solutions for Customized Automation Needs

Both the WindowTouch and OneTouch  
Models can be integrated into an automatic robotic  
hardware insertion cell.

Experience Increased Flexibility  
Combined with Unmatched Performance, Ease of Use, and  
Reliability

Total Quality Control Benefits:

- No Missing Fasteners
- No Fasteners in the Wrong Hole
- No Fasteners Installed on the Wrong Side of the Part
- No Scratches on Parts

Increase in Productivity Benefits:—see an increase from 50% to 200%:

- Single Part Handling only
- Consistent Speed with an Average of 1 Insertion every 5 Seconds

Decrease in Labor Requirements:

- Minimal Set Up Time - 10 to 30 minutes - with use of exclusive off-line programming software
- No Operator Intervention - 4 to 10 Hours with Lot Sizes 200-500
